JUKKA RUUSKA, CEO

"In the first quarter, Asiakastieto Group's net sales continued with a strong growth of 15,6 %. The growth was partially contributed by the late Easter, due to which there were three so-called banking days more than last year. The net sales amounted to EUR 13,8 million (EUR 12,0 million). In Asiakastieto Group, the most important source for growth are the continuous service development and new services. Therefore, I am immensely satisfied that the share of new services of the net sales turned again to growth, being now 8,1 %.

The adjusted EBIT increased by 9,3 per cent in the first quarter, totalling EUR 5,5 million (EUR 5,0 million). As planned, the increase in EBIT is slower than that of net sales, because the strongest growth in sales is focused on services, the production of which requires data to be bought outside our own database.

As stated previously, we see the year 2017 as a breakthrough for the automation of compliance activities. In the first quarter we introduced to our clients e.g. the opportunity to automatically check, whether a person is liable to tax in the United States. In the second quarter we will further expand the selection with service entities, which simultaneously intensify the compliance processes of our clients and strengthen and unify the customer experience offered."

NET SALES

January - March

Asiakastieto Group's net sales in the first quarter amounted to EUR 13,8 million (EUR 12,0 million) and increased by 15,6 % compared to the corresponding quarter of the previous year. Net sales from new products and services were EUR 1,1 million (EUR 1,2 million), which was 8,1 % (10,1 %) of the total net sales for the first quarter. The growth of net sales was impacted by greater number of banking days in the first quarter than in the corresponding quarter of the previous year, a positive trend of sales evolution of new products, the consolidation of Intellia Oy to Group accounts from 1 October 2016, good sales development of real estate services and the development of economic volume. One off type of project revenue recognitions were in lesser amount than in the corresponding quarter of the previous year.

Product area specific net sales will be reported based on a new product area breakdown, effective from 1 January 2017. The corresponding figures from the previous year have been calculated applying the same breakdown.

Business Information's net sales in the first quarter amounted to EUR 8,1 million (EUR 7,6 million) and increased by 5,9 % compared to the corresponding quarter of the previous year. The net sales were positively impacted by the sales of value added services, such as Rating Alfa and sales from new products launched in 2016-2017 as well as general economic transaction volumes. From the beginning of 2017, Business Information also includes Certificates and Analyses, which was an own product area in 2016.

Consumer Information's net sales in the first quarter amounted to EUR 3,5 million (EUR 3,2 million) and increased by 11,6 % compared to the corresponding quarter of the previous year. In the first quarter sales performance was good in the majority of services especially due to the continued general economic volume growth. Also services sold to consumers directly were growing significantly. In 2016 Consumer Information included real estate services, which have been incorporated to form part of Real Estate and Collateral Information Services product area at the beginning of 2017.

Customer Management's net sales in the first quarter amounted to EUR 1,3 million (EUR 0,6 million), and increased by 101,4 % compared to the corresponding quarter of the previous year. The product area includes net sales of Intellia Oy. Intellia was consolidated to the Group from 1 October 2016 and therefore is not impacting the corresponding period of previous year. The sales of the consumer section of the product area was better than anticipated. In addition, the launch of the new target group tool Company Filter Pro was successful.

Net sales of the Real Estate and Collateral Information Services product area in the first quarter amounted to EUR 1,0 million (EUR 0,6 million) and increased by 70,4 % compared to the corresponding quarter of the previous year. The product area's positive evolution of net sales was impacted by continuous service development and general amount of economic transaction volumes.

RISKS AND UNCERTAINTIES IN THE NEAR FUTURE

The demand for the Group's products and services depends on the activity of the business operations of its customers. Slow economic growth or a declining economy may result in a weakening demand for the services of Asiakastieto Group.

A general tendency to seek cost savings in business activities and the tightening competition in the Group's business sector may cause downward pricing pressure, which may have a negative effect on revenue and profit.

Asiakastieto Group believes that its continued success will be influenced by its ability to meet customers' needs through the development of products and services that are easy to use and that seek to increase customers' business process efficiency, offer cost savings, and facilitate better business decisions. Potential deficiencies in the management of the product development portfolio as well as a shortage of development resources may delay the introduction of new services or enhancements to the market and therefore weaken the Group's results.

Well-functioning information technology and good availability of services are essential conditions for the business operations of Asiakastieto Group. Notwithstanding the current solutions for high availability and protection solutions in accordance with best practices, the realisation of external or internal threats can never be completely eliminated. The realisation of risks of this kind could result in misuse,

modification or illegal publication of information and could have legal consequences or cause reputational harm, loss of revenue, claims or regulatory actions.

FUTURE OUTLOOK

Asiakastieto Group expects its net sales growth rate to be within the range of long term target. Adjusted euro-nominated net operating profit is expected to grow from last year but at a slower pace than net sales.

The outlook is subject to risks related to, among other factors, the development of the Finnish economy and the business operations of the Group. The most significant risks related to business operations include, for example, risks related to the success of product and service development activities, launches of new products and services and risks related to competitive tenders and to losing significant customer accounts.

Asiakastieto Group's business risks have been described in more detail on the Company's investor pages at investors.asiakastieto.fi.

2. Notes

2.1. Accounting policies

This Interim Report has been prepared in accordance with IAS 34 Interim Financial Reporting. The accounting policies and methods applied in this Interim Report are the same as those applied in the financial statements for the financial year ended 31 December 2016.

The preparation of financial statements in accordance with IFRS requires Asiakastieto Group's management to use estimates and assumptions that affect the reported amounts of assets and liabilities, as well as the reported amounts of income and expenses for the interim period. In addition, it is necessary to exercise judgment in applying the accounting policies. Because estimates and assumptions are based on the understanding as at the end of the interim period, they include risks and uncertainties. The actual results may differ from the estimates and assumptions made. Critical accounting estimates and judgments are disclosed in more detail under the note 3 to the consolidated financial statements for the year 2016.

In its Interim Report Asiakastieto Group Plc discloses alternative performance measures to depict the financial development of its business operations and to improve comparability between different periods. Alternative performance measures are not included in IFRS based consolidated financial statement as such, but they are derived from IFRS based consolidated financial statements or interim reports by amending parts of main calculations or notes and/or making them proportional. Alternative measures should not be considered replacing indicators compared to the performance measures defined in the IFRS financial statements norms. All companies do not calculate alternative performance measures in the same way, and therefore alternative performance measures used by the Company are not necessarily comparable with other companies, even if named in the same way. Alternative performance measures shown in this Interim Report have been calculated according to the same principles described in group financial statement 2016 disclosed under the note 2.

The amounts presented in the income statement and in the balance sheet are consolidated figures. The amounts presented in the Interim Report are rounded, so the sum of individual figures may thus differ from the sum reported. The figures presented in this Interim Report are unaudited.

Long-term incentive plan to the management

In March 2015, the Board of Directors of the Company established an incentive plan for the management of the Group. The plan is based on the Group's management making individual investments in Asiakastieto Group Plc's shares and the opportunity for the Group's management to be awarded further shares on the basis of meeting long-term performance criteria and a commitment to the company. In order to participate in the plans and receive an award from the plans, the members of the Group's management acquired, in the personnel offering, the number of shares determined by the Board of Directors. Any shares acquired above the amount of shares determined by the Board of Directors are not entitled to an award. The long-term incentive plan contains two elements: a performance based share plan and a matching share plan.

In general, no award shall be paid if the employment or service contract terminates before the award payment. Any awards shall be paid partly in shares and partly in cash. The cash proportion is intended to cover taxes and tax-related costs arising from the award to the participants.

The participants must retain at least 50 per cent of all net shares received on the basis of the plan until the participant's share ownership equals his/her annual gross base salary. Such number of shares must be held as long as the participant's employment or service at Asiakastieto Group continues.

The plan is directed to approximately ten key members of the Group's personnel, including all members of the executive team. The awards to be paid out through the performance based share plan and the matching share plan, correspond to the value of 108 000 shares at a maximum including also the cash proportion and with the assumption that the criteria for the performance based share plan are achieved to its maximum.

In June 2016 the Board of Directors of Asiakastieto Group Plc resolved to continue the key employee performance share plan as resolved by the Board in March 2015. Should the targets of the plan resolved in June be attained in full, the payable rewards will correspond to a maximum total of 72 000 Asiakastieto Group shares, including also the cash proportion.

Long-term incentive plan to the management is in the scope of IFRS 2. For the interim period, an accrued expense EUR 46 thousand (EUR 53 thousand) has been recognised in personnel expenses.

Matching Share Plan 2015

In the personnel offering, the members of the Group's management subscribed Personnel Shares, the ownership of which is a prerequisite for participating in the long-term incentive plan. The acquisition of Personnel Shares within the matching share plan entitles the participant to be awarded one additional share for each Personnel Share within the plan in four years' time, provided that the participant's employment or service at the company continues and the Personnel Shares acquired within the plan are still held by the participant at such time.

Performance Based Share Plan 2015

The long-term incentive plan includes the possibility to be awarded with further shares based on a set of performance criteria. The performance-based award for the period March 2015 – March 2018 shall be based on the total shareholder return calculated on the Asiakastieto Group Plc's share, adjusted for dividends paid. Any earned award shall be paid out to participants after the end of the performance period.

Performance Based Share Plan 2016

The long-term incentive plan includes the possibility to be awarded with further shares based on a set of performance criteria. The performance-based award for the period July 2016 – December 2018 shall be based on the total shareholder return calculated on the Asiakastieto Group Plc's share, adjusted for dividends paid. Any earned award shall be paid out to participants in 2019.
